

i-scrub 30EM

Orbital power
without
sideforce

Advanced orbital technology

Single-disc scrubbing has never looked so good.

Advanced orbital technology is based on 175 RPM which simulates an orbital movement with no sideforces, so everybody can operate it without training. With a detachable power cord and all of the controls inside of the head, the i-scrub 30EM is a nifty machine with a lot of power. With the water tank on top, you can mix your chemicals to perfection. And to prevent damages to furniture and walls, we've created a rubber bumper for you to work freely!

Closed off cover

The closed off cover design protects the engine from exposure to water. It also adds an extra protective layer to the i-scrub 30EM.

Key features

Aluminum diecast

Heavy grade aluminum diecast housing adds resistance and weight to the machine, adding to the high brush pressure, to clean more in less time.

Detachable solution tank

The solution tank is easily detached with a single movement. This makes it easy to fill, refill and clean the tank while on the job.

Centralized controls

Centralized controls are located in the head of the machine. All of your actions, switches and controls are within the reach of your fingertips.

Soft grips

The soft grips of the machine create a sense and feel of superb control and excellent ergonomics for the user.

Every floor perfectly scrubbed

Scrub any surface to perfection with different pads and fittings for the orbital movement. Consult the i-team for any advice on your cleaning needs.

Technical specifications

Application	Outdoor use in dry weather conditions. Hard and soft surfaces.
Brush speed	175 RPM / 2000 RPM orbital movement
Effective area of operation	39 cm ø
Size machine (l x w x h)	128 x 37.5 x 27 cm
Weight of product	13 kg
Weight in box	17 kg
Cable length	1000 cm
Clean water tank	1.7 L
Material machine	Zinc Alloy, Aluminium, ABS
Voltage & frequency	Available in 110, 115, 230, 240 V
Motor power	250 W
Sound level	50 dBA

V1.01-20171108
